<sup>1</sup>For 2 heating circuits with mixer (accessories required).

<sup>2</sup>One for the multi boiler system.

<sup>3</sup>For each lag boiler in the multi boiler system.

<sup>4</sup>For each boiler in the multi boiler system.

## VITOCROSSAL 100

Gas condensing boiler  
80 to 318 kW

12.1

### Vitocrossal 100

#### Type CIB

Gas condensing boiler with MatriX cylinder burner for natural gas E and LL, for open flue or room sealed operation

- With hydrogen blends of up to 20 % by vol.

Permissible operating temperature up to 95 °C

Permissible safety temperature up to 110 °C

Permissible operating pressure 6 bar (0.6 MPa)

CE designation: CE-0085CR0391

Safety equipment sized to rated heating output at a system temperature of 80/60 °C (EN 12828).

The boiler is intrinsically protected against low water.

- Condensing unit with MatriX cylinder burner with Lambda Pro Control, 75 to 318 kW, also available as a dual system up to 636 kW in a single casing
- Boiler available as pre-wired and pre-assembled unit or as individual components
- Standard seasonal efficiency [to DIN] up to 98 % (Hs) [gross cv]
- High operational reliability and a long service life due to corrosion-resistant Inox-Crossal heat exchanger made from stainless steel.
- Low-wear operation through wide modulation range and long burner runtimes without cycling.
- MatriX cylinder burner with Lambda Pro Control for environmentally responsible operation, with a modulation range down to 1:5.
- Easy to operate Vitotronic control unit with plain text and graphic display
- Clean combustion through self-calibrating, gas-adaptive combustion control (NOx category 6)
- Space saving and compact; integral castors and well fitted packaging make it ideal where access to the boiler room is difficult.
- Vitocontrol control cabinet can be supplied on request.

# VITOCROSSAL 100

Single boiler system with constant temperature control unit

12.1

## Heating system

- Single boiler system for operation with constant boiler water temperature

## Control unit

### Vitotronic 100

#### Type GC7B, for constant temperature mode

- Boiler control unit
- For a modulating burner
- With cylinder temperature controller (cylinder temperature sensor must be ordered separately)

According to the GEG (German Buildings Energy Act), a weather-compensated or room temperature-dependent control unit with time program for reduced mode must be installed downstream (see Register 11.1).

For single boiler systems, the cylinder temperature sensor must be ordered separately:

#### Cylinder temperature sensor

Part no. 7179114

Euro 110,- MG W

Standard delivery:

- Boiler body with thermal insulation, adjustable feet and castors
- Boiler control unit
- MatriX cylinder burner
- Boiler flue connection (bend)

#### Required Accessories:

The following accessories are required to operate the Vitocrossal 100, type CIB, and must be added to the order:

- Accessories for room sealed operation  
or
- Accessories for open flue operation (for boilers with 200 kW or higher)

#### Please note:

For operating conditions and design information as regards the integration of hydraulic and control equipment, see the technical guide and datasheet.

MatriX cylinder burners have a manufacturer's certificate in line with BlmSchV.

► For mating flanges for the boiler flow and return, see Accessories.

# VITOCROSSAL 100

Single boiler system with weather-compensated control unit

12.1

## Heating system

## Control unit

**Vitotronic 200**  
**Type GW7B, for weather-compensated mode**

- Boiler control unit
- For a modulating burner
- With cylinder temperature controller (cylinder temperature sensor must be ordered separately)
- With individual day and seven-day program
- Adjustable heating curves, set temperatures and heating programs
- With integral diagnostic system
- Capable of communicating via LON bus (LON communication module must be added to the order)

With connection option for one heating circuit without mixer and 2 heating circuits with mixer.  
 An extension is required for each **heating circuit with mixer**:

**Mixer extension kit (mixer mounting)**  
 Part no. ZK02940      Euro 652,-    MG W

**Mixer extension kit (wall mounting)**  
 Part no. ZK02941      Euro 428,-    MG W

**Cylinder temperature sensor**  
 Part no. 7179114      Euro 110,-    MG W

Standard delivery:

- Boiler body with thermal insulation, adjustable feet and castors
- Boiler control unit
- Outside temperature sensor
- MatriX cylinder burner
- Boiler flue connection (bend)

**Required Accessories:**

The following accessories are required to operate the Vitocrossal 100, type CIB, and must be added to the order:

- Accessories for room sealed operation  
or
- Accessories for open flue operation (for boilers with 200 kW or higher)

**Please note:**

For operating conditions and design information as regards the integration of hydraulic and control equipment, see the technical guide and datasheet.

MatriX cylinder burners have a manufacturer's certificate in line with BlmSchV.

► For mating flanges for the boiler flow and return, see Accessories.

# VITOCROSSAL 100

Twin boiler system

12.1

## Heating system

Twin boiler and 1 or 2 heating circuits with mixer

## Control unit

**Vitotronic 100/300-K**  
Type GC7B/MW1B, for weather-compensated mode

**Vitocrossal 100 with standard control equipment for twin boilers (in shared thermal insulation)**

**Weather-compensated cascade control of 2 boilers with Vitotronic 100 and control of up to 2 heating circuits with mixer.**

- With individual day and seven-day program
- With separately adjustable time periods, heating curves, set temperatures and heating programs
- With cylinder temperature controller and sensor
- Capable of communicating via LON bus (in the Vitotronic 300-K, the LON communication module is built-in; for the Vitotronic 100, it is supplied separately)
- With integral diagnostic system and additional functions

To terminate the system bus, a terminator must be added to the order:

**Terminators (2 pce)**

Part no. 7143497

**Euro 10,50 MG W**

### Note on hydraulic system pipework:

For systems with 2 boiler circuit pumps, please order the boiler for a multi boiler system and accessories "Hydraulic system pipework (without shut-off dampers)".

### Note on multi boiler systems/cascade control:

- For systems with more than one twin boiler or for cascade control with other heat generators, we recommend constructing the system from single boilers.
  - ▶ See next double page.
- For twin boilers with a **common flue**, a pressure switch connection set is essential (see Accessories). The flue gas headers available as accessories from the Viessmann accessories range include the pressure switch connection set and motorised flue gas dampers as part of the standard delivery.

### Standard delivery:

- 2 boiler bodies with adjustable feet and castors
- 1 set of thermal insulation for both boiler bodies (twin boiler)
- 2 MatriX cylinder burners
- 2 boiler flue connections (bends)
- 1 Vitotronic 300-K weather-compensated cascade control unit
- 2 Vitotronic 100 boiler control units, fully wired
- 2 LON communication modules for installation in the Vitotronic 100
- Outside, cylinder and flow temperature sensor
- Hydraulic system pipework (flow and return header, 2 motorised butterfly valves)

### Required Accessories:

The following accessories are required to operate the Vitocrossal 100, type CIB, and must be added to the order:

- Accessories for room sealed operation
  - or
  - Accessories for open flue operation (for boilers with 200 kW or higher)

### Please note:

For operating conditions and design information as regards the integration of hydraulic and control equipment, see the technical guide and datasheet.

MatriX cylinder burners have a manufacturer's certificate in line with BlmSchV.

▶ For mating flanges for the boiler flow and return, see Accessories.

Multi boiler systems

12.1

## Heating system

■ Max. 4 boilers

## Control unit

**Vitotronic 100/300-K**  
**Type GC7B/MW1B, for weather-compensated mode**

**Vitocrossal 100 with standard control equipment for multi boiler systems.**

**Weather-compensated cascade control of up to 4 boilers with Vitotronic 100 and control of up to 2 heating circuits with mixer.**

- With individual day and seven-day program
- With separately adjustable time periods, heating curves, set temperatures and heating programs
- With cylinder temperature controller and sensor
- Capable of communicating via LON bus (in the Vitotronic 300-K, the LON communication module is built-in; for the Vitotronic 100, it is supplied separately)
- With integral diagnostic system and additional functions

To terminate the system bus, a terminator must be added to the order:  
**Terminators (2 pce)**  
 Part no. 7143497      Euro 10,50    MG W

■ Max. 4 boilers

**Vitotronic 100**  
**Type GC7B, for weather-compensated mode**

**In conjunction with Vitotronic 300-K of the multi boiler system.**

- For each additional **boiler** in a **multi boiler system**
- Boiler control unit
- For a modulating burner
- Capable of communicating via LON bus (with LON communication module, supplied separately)

**Note on cascade control with a CHP unit or other heat generators:**

Vitotronic, for weather-compensated cascade control of boilers with a Vitotronic 100 control unit and a Vitobloc 200 CHP unit or other heat generators on request.

**Note on multi boiler system with a common flue:**

All multi boiler systems with a **common flue** (positive pressure operation) require motorised flue gas dampers (see Accessories).

**Please note:**

For multi boiler systems with a common flue, the following accessories are **always** mandatory, depending on the type of multi boiler system:

- **Pressure switch connection set** for two-boiler systems consisting of 2 Vitocrossal, type CIB, with the same rated heating output. The flue gas headers available as accessories from the Viessmann accessories range include the pressure switch connection set and motorised flue gas dampers as part of the standard delivery.
- Or
- **Relay box and relay box connection set** for two-boiler systems consisting of 2 Vitocrossal, type CIB, with different rated heating outputs, or two-boiler systems with one different boiler, or for multi boiler systems with up to 4 boilers

Standard delivery:

- Boiler body with thermal insulation, adjustable feet and castors
- MatriX cylinder burner
- Boiler flue connection (bend)
- Vitotronic 100 boiler control unit, fully wired, and LON communication module supplied separately
- 1 Vitotronic 300-K cascade control unit for the multi boiler system
- Outside, cylinder and flow temperature sensor

**Required Accessories:**

The following accessories are required to operate the Vitocrossal 100, type CIB, and must be added to the order:

- Accessories for room sealed operation
- or
- Accessories for open flue operation (for boilers with 200 kW or higher)

**Please note:**

For operating conditions and design information as regards the integration of hydraulic and control equipment, see the technical guide and datasheet.

MatriX cylinder burners have a manufacturer's certificate in line with BlmSchV.

► For mating flanges for the boiler flow and return, see Accessories.

## Accessories

### Hydraulic system pipework

#### Hydraulic system pipework

For two-boiler systems with 240 or 320 kW, with 2 boilers side by side, each with 120 or 160 kW

Nominal diameter DN 50/80

- Flow and return header ①
- Motorised butterfly valves (2 pce) ②
- Connection flange with gaskets ③

Standard delivery of the hydraulic system pipework

ZK02862  
3.202,-

MG W  
Part no.  
Euro

#### Hydraulic system pipework

For two-boiler systems with 400, 480, 560 or 636 kW, with 2 boilers side by side, each with 200, 240, 280 or 318 kW

Nominal diameter DN 65/100

- Flow and return header ①
- Motorised butterfly valves (2 pce) ②
- Connection flange with gaskets ③

Standard delivery of the hydraulic system pipework

ZK02863  
3.380,-

Part no.  
Euro

#### Hydraulic system pipework (without shut-off dampers)

For two-boiler systems with 240 or 320 kW, with 2 boilers side by side, each with 120 or 160 kW

Nominal diameter DN 50/80

- Flow and return header ①
- Connection flange with gaskets ②

Standard delivery of the hydraulic system pipework

ZK03280  
902,-

## Flue system

For Vitocrossal with 80 to 636 kW  
Made from plastic (PPs)

Flue system For open flue operation CE approval to EN 14471			MG WZ
System size	110	125	Ø mm
⑦ 87° inspection bend	7247559 68,—	7149966 182,—	Part no. Euro

Max. total flue length up to the boiler flue connection								
Vitocrossal CIB — single boiler system								
Rated heating output	80	120	160	200	240	280	318	kW
Max. total length								
■ System size 110	30	14	—	—	—	—	—	m
■ System size 125	30	30	18	8	—	—	—	m
■ System size 160	—	—	30	30	30	8	—	m
■ System size 200	—	—	—	—	30	30	30	m

### Please note:

- Allowance has been made for: length of the connection piece 2 m, three 87° bends (incl. support bend) and Ø of the connection piece to match flue pipe system size.
- The appliances may be connected to **balanced flue chimneys or moisture-resistant chimneys to DIN EN 13384**, if the chimney manufacturer can verify their suitability based on the specified flue gas values, considering local conditions (e.g. heating water return temperature, type of connection piece, etc.).
- For **room sealed** operation with parallel flue gas/ventilation air routing, the same components are used for ventilation air as for flue gas routing.
- System size 110 mm may only be used for **open flue** operation.
- Flue pipes with total length >30 m available on request

### Note on twin boiler systems:

- For twin/two-boiler systems, a flue gas header can be used; see price sheet for the boiler.
- The system size of the continuing flue system must be Ø 200 mm, Ø 250 mm or Ø 300 mm. For the max. total flue pipe length, see the technical guides.

## Flue system

## Flue system

For Vitocrossal with 80 to 636 kW  
 Made from plastic (PPs)  
 System size Ø 160, 200 and 250 mm

**Flue system**  
 For open flue operation  
 CE approval to EN 14471

### Max. total flue length up to the boiler flue connection

Vitocrossal 200, type CM2							
Rated heating output	400	500	620				kW
Max. total length:							
■ System size 200	–	–	–				m
■ System size 250	30	30	30				m
Vitocrossal 200, type CM2C							
Rated heating output	87	115	142	186	246	311	kW
Max. total length:							
■ System size 110	16	–	–	–	–	–	m
■ System size 125	30	20	10	–	–	–	m
■ System size 160	–	30	30	30	10	–	m
■ System size 200	–	–	–	–	30	30	m

#### Please note:

- Max. lengths for installation at 50 m above sea level; for installation at substantially higher altitudes, shorter lengths or output losses apply
- Allowance has been made for: length of the connection piece 2 m, three 87° bends (incl. support bend) and Ø of the connection piece to match flue pipe system size.
- The appliances may be connected to **balanced flue chimneys or moisture-resistant chimneys to DIN EN 13384**, if the chimney manufacturer can verify their suitability based on the specified flue gas values, considering local conditions (e.g. heating water return temperature, type of connection piece, etc.).
- **Room sealed** operation with parallel flue gas/ventilation air routing is possible with the same components as for the ventilation air routing.
- Flue pipes with total length >30 m available on request

► For a flue system for connection to the flue gas header, see the Vitoset Pricelist.

## Flue system

# VITOCROSSAL 300

Gas condensing boiler  
787 to 1400 kW

## Vitocrossal 300

### Type CR3B

Gas condensing boiler for natural gas E, LL and LPG

- With 2 return connectors
- Delivered in **sections**.

Permissible operating temperature up to 95 °C

Permissible safety temperature up to 110 °C

Permissible operating pressure 6 bar (0.6 MPa)

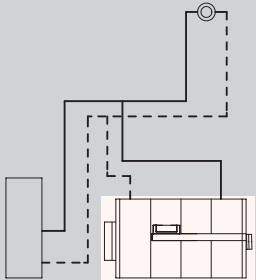

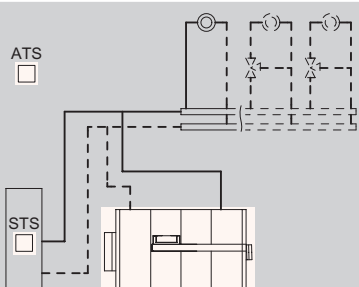

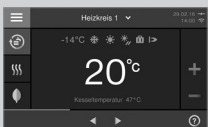

CE designation: CE-0085AU0315

- Standard seasonal efficiency [to DIN]: up to 98 % (H<sub>s</sub>) [gross cv]
- High operational reliability and a long service life through corrosion-resistant Inox-Crossal heat exchanger made from stainless steel
- Inox-Crossal heat exchanger for highly effective heat transfer and condensation rate
- Self-cleaning effect due to smooth stainless steel surface
- Clean combustion through low combustion chamber loading and straight-through design
- Alternatively with ELCO or Weishaupt pressure-jet gas burner
- Split design for easy handling
- 2 return connectors for hydraulic connection optimised for condensing technology
- Easy to use Vitotronic control unit with colour touchscreen
- Integral WiFi for service interface
- Economical and safe operation of the heating system through the Vitotronic control system with communication capability – enables integration into building management systems in conjunction with Vitogate 300 (accessory)
- Vitocontrol control cabinet available on request

Weight	1553	1635	1980	2185	kg
Flue gas connection	300	300	350	350	Ø mm

**Please note:**

For burner mounting, use the burner plate (undrilled) supplied and included in the price. Upon request, we will supply drilled burner plates for various burner makes.

The available draughts are achieved with the pressure-jet gas burners (Weishaupt and ELCO) in our product range and with many other pressure-jet gas burners.

Different available draughts should be agreed upon with the burner supplier. If using the Vitocrossal 300 with moisture-resistant chimneys, the draught must be no more than 0 Pa.

**Please note:**

In accordance with the information provided in the datasheet for the boiler, it is essential to consult the burner manufacturer regarding the required back pressure and the pressure in the flue system.

The flue gas damper (accessories) can be used to increase the back pressure or control resonance in the flue system. The flue gas damper should be added to the order if required.

# VITOCROSSAL 300

Multi boiler system

## Heating system

## Control unit

**Vitotronic 300**  
Type CM1E, for weather-compensated mode

**With standard control equipment for multi boiler systems**

- With integral cascade function for up to 8 boilers
- Control of up to 2 heating circuits with mixer (included in the standard delivery)
- Setting of operating programs, set values and time programs for central heating and DHW cylinder heating
- With cylinder temperature controller and sensor
- With energy cockpit, integral diagnostic system and additional functions
- Capable of communicating via LON bus (LON communication module included in standard delivery)

To terminate the system bus, a terminator must also be ordered:  
**Terminators (2 pce)**  
Part no. 7143497      Euro 10.50 MG W

**Vitotronic 100**  
Type CC1E, for weather-compensated mode

**In conjunction with the Vitotronic 300 of the multi boiler system**

- For each additional boiler in a multi boiler system
- Top-mounted boiler control unit
- For 2-stage or modulating burner
- Capable of communicating via LON bus

One LON communication module **must** also be ordered for each boiler:  
**LON communication module with connecting cable**  
Part no. Z003394      Euro 290,- MG W

**Please note – for cascade control with a CHP unit or other heat generators:**

Vitocrossal, for weather-compensated cascade control of boilers with a Vitotronic 100 control unit and a Vitobloc 200 CHP unit or other heat generators on request

Standard delivery:

**12.5**

- Boiler body
- Thermal insulation
- Boiler control unit, fully wired
- Boiler door with burner plate
- Mating flanges with screws and gaskets.
- Flue collar

12.5-4 **VIESSMANN**

**Please note:**

For operating conditions and design information as regards the integration of hydraulic and control equipment, see the technical guide and datasheet.
